

## **Model AP20 & AP24** *Aluminium Framed Flat Panel Filters*

- Ideal for applications where low cost & low pressure drop is required
- 20 & 24 mm frame depth
- Washable
- Classification G1-G4

### **Construction:**

Filters are manufactured from either 20 mm or 24mm aluminum frame with galvanised wire mesh on both sides to provide media support.

### **Filter Media Types:**

Filters are supplied standard with medium grade washable media type BR16. Other filter medias are available to suit application.

### **Application:**

Generally used in small air conditioning and ventilation systems requiring low cost, low resistance filters. Filters are usually fitted into slides in ducts or behind return air grilles. Media is not replaceable. (For replaceable media type, see model RM20/24.)

### **Dimensions:**

Filters are available with a frame depth of either 20 or 24 mm, special depths are available on request.

Filters can be manufactured to any dimension up to 1200 x 1200 mm, although, it is suggested sizes are kept below 900 mm x 800 mm for rigidity. Frame support braces are fitted to larger sizes.

# **Model AP20 & AP24 Flat**

## **Aluminium Framed Flat Panel Filters**

### **Maintenance:**

The filter panel is readily removed from the filter holding frame or slide. If the filter media is washable, the filter can then be cleaned by rinsing the filter with cold water from a medium pressure hose, back through the clean air side of the media. Allow the filter media to fully dry before re-installing. Washable filters can be washed up to 15 times before the media needs to be replaced, however filter performance will progressively deteriorate with each wash.

(Note: Local council water authorities may not permit discharge of run off from filter washing, to enter storm water drains.)

### **Performance Data:**

The logo for Australian Plantroom Services (APS) consists of the letters 'APS' in a bold, blue, sans-serif font. The letters are closely spaced and have a slight shadow effect.
